ASSESSMENT 3 BRIEF: DIGITAL FRUIT EXHIBITION

Assessment	Digital Fruit Exhibition
Individual/Group	Group (pairs)
Length	Curated digital gallery with 10 entries plus reflection
Learning Outcomes	• (c) Organize a digital collection of fruit images and notes, applying a consistent tagging scheme for easy reference. • (g) Curate a digital collection with consistent metadata, tagging, and visual presentation standards. • (h) Present a curated fruit exhibition that communicates sensory, cultural, and botanical insights.
Submission	Due by 23h55 GMT two weeks after the final facilitated session
Weighting	50%
Total Marks	100

TASK SUMMARY

Working in pairs, curate a digital fruit exhibition featuring ten tropical fruits. Each entry must include a photograph, sensory description, cultural or botanical notes, and consistent metadata. Submit the exhibition as a styled HTML page or Markdown document with a 500-word curator's reflection.

CONTEXT

Digital exhibitions allow curators to share collections with a global audience. This assessment brings together everything you have learned about observation, documentation, tagging, and visual presentation. Your exhibition should tell a story – not just a list of fruits, but a curated journey that reveals connections between sensory experience, cultural significance, and botanical diversity.

TASK INSTRUCTIONS

1. **Form a pair** with a classmate. Divide responsibilities for research, photography, writing, and design.
2. **Select ten tropical fruits** that represent diversity in colour, texture, origin, and cultural significance. At least three fruits should be from outside the citrus and stone fruit families covered in early modules.
3. **Create an entry for each fruit** containing:
   - A high-quality photograph (original or properly attributed)
   - A 100–150 word sensory description
   - Cultural or botanical notes (origin, traditional uses, interesting facts)
   - Consistent metadata tags (family, origin region, season, flavour profile)
4. **Design the exhibition** as a single HTML page or styled Markdown document with:
   - A title and introductory curator's statement (150 words)
   - A consistent visual layout with clear navigation between entries
   - A searchable tag index or filter system
   - Proper image attribution throughout
5. **Write a 500-word curator's reflection** explaining your selection rationale, curatorial decisions, and what you learned about digital collection presentation.
6. **Submit** the exhibition file, all assets, and reflection as a ZIP archive.

SUBMISSION INSTRUCTIONS

Submit a ZIP archive named `ass_03_digital_exhibition.zip` containing:

- `exhibition.html` or `exhibition.md` (your main exhibition file)
- `assets/` folder with all images
- `reflection.md` (your curator's reflection)
- `README.md` listing all files and attributions

Upload to the LMS submission portal. Only one submission per pair is required; include both student names and IDs in the README.

REFERENCING

Image sources must be attributed in the exhibition itself (captions or footer). Written sources should be cited in APA 7th edition within the reflection and exhibition text where appropriate. A minimum of six sources is expected across the pair's research.

AI Policy

AI supports your learning, it does not replace your intellectual work. You are accountable for understanding and explaining all submitted material. Implicitly claiming AI-generated content as your own work constitutes academic misconduct and insufficient authorship.

Writing

- **Permitted:** AI for brainstorming, drafting ideas, refining phrasing, and checking grammar or clarity. Crucial: Critically evaluate, modify, and fully understand any AI output you integrate into your work.
- **Prohibited:** Submitting AI-generated text without thorough mental parsing and comprehension. Ask yourself: If interviewed, can you explain every choice and observation in your own words?

Visuals

- **Permitted:** AI for inspiration, mood boards, layout ideas, colour suggestions, and rough visual concepts. Crucial: Adapt, refine, justify, and understand any AI-assisted visual choices you include.
- **Prohibited:** Submitting AI-generated images or designs as your own without meaningful revision and understanding. Ask yourself: If interviewed, can you explain your visual decisions and how each element supports your work?

ACADEMIC INTEGRITY DECLARATION

I declare that, except where I have referenced, the work I am submitting for this assessment task is my own work. I have read and am aware of my institution's Academic Integrity Policy and Procedure.

I am aware that I need to keep a copy of all submitted material and its drafts, and I will do so accordingly.

ASSESSMENT RUBRIC

Assessment Attributes	Fail *0–49%*	Pass *50–64%*	Credit *65–74%*	Distinction *75–84%*	High Distinct. *85–100%*
Fruit Selection & Diversity *20%*	Limited range; fruits are repetitive or poorly chosen.	Adequate range but lacks intentional curation.	Thoughtful selection showing diversity across multiple dimensions.	Rich, balanced selection that tells a coherent story.	Exceptional curation; each fruit earns its place and contributes to the narrative.
Sensory Descriptions *25%*	Descriptions are brief, generic, or absent.	Basic descriptions present but lack depth or sensory variety.	Clear, engaging descriptions across multiple sensory dimensions.	Vivid, precise descriptions that bring each fruit to life.	Masterful sensory writing; descriptions are evocative, original, and insightful.
Metadata & Organisation *20%*	Tags missing or inconsistent; poor organisation.	Basic tags present but limited in scope or consistency.	Consistent, well-structured metadata with useful categories.	Comprehensive metadata enabling meaningful browsing and discovery.	Sophisticated taxonomy with cross-referencing and thoughtful organisational logic.
Visual Presentation *20%*	Layout is messy or broken; images are low quality.	Functional layout but lacks visual polish or consistency.	Clean, attractive design with consistent formatting throughout.	Professional-quality presentation with thoughtful visual hierarchy.	Exhibition-quality design; every visual decision serves the curatorial vision.
Curator's Reflection *15%*	Reflection missing or superficial.	Basic reflection describes choices without deeper insight.	Thoughtful reflection connecting decisions to learning outcomes.	Insightful reflection showing critical awareness of curatorial practice.	Exceptional reflection demonstrating sophisticated understanding of digital curation.
